# TIEN NGUYEN (BRYAN)

WEB DEVELOPER

As a **Web Developer** with a strong foundation in JavaScript and practical experience with React/Vue, I am eager to contribute to the development of high-quality web products, focusing on performance optimization and user experience. My goal is to continuously advance my technical expertise while delivering long-term value to the company.

## INFORMATION

tienhg201@gmail.com

Hoang Liet Ward, Hanoi

## EDUCATION

**Hanoi University of Civil Engineering**

Information technology

08/2019 - 06/2024

## SKILLS

**Frontend**
ReactJS, Tailwind (Tailwind CSS), NextJS, Material UI, Redux, Redux Toolkit

**Backend**
ExpressJS, Spring boot

**DevOps & Deployment**
Docker

**Database**
MongoDB, PostgreSQL

## ACTIVITIES

12/2024 - PRESENT

**KOOLSOFT**

**Web Developer**

A software company operating in the EdTech sector and web/mobile app development, providing e-learning solutions for businesses and training organizations.

12/2024 - PRESENT

**DCASKS**

**Web Developer**

A blockchain ecosystem tailored for the wine and spirits industry, enabling Real-World Asset (RWA) tokenization, strict provenance tracking, and transparent transactions. The platform encompasses a comprehensive web application and a Telegram Mini App, featuring seamless crypto wallet integration and robust smart contract interactions.

06/2024 - 12/2024

**VITECH GROUP**

**Nodejs Developer**

A technology firm specializing in the development of custom Windows applications, designed to serve enterprise clients, community users, and internal business operations.

6/2023 - 06/2024

**ROCKET GAME STUDIO**

**Frontend Developer**

Rocket Game Studio is a leading mobile game development and publishing company in Vietnam. Targeting the global market, the studio specializes in Casual, Hyper-casual, and Mid-core genres, boasting a diverse portfolio of games with tens of millions of downloads worldwide.

of games with tens of millions of downloads worldwide.

1/2023 - 6/2023

**NTQ Solution JSC**

**Web Developer Intern**

NTQ Solution JSC is a premier IT Outsourcing and Software Development company in Vietnam. The company specializes in delivering high-quality tech solutions and digital transformation services to global markets, with a strong focus on Japan, Korea, Europe, and the US.

## PROJECTS

09/2025 - PRESENT

**DCASKS**

**Web Developer (Frontend + Backend)**

**Web3 & Telegram Mini App**

- **DApp Development & Smart Contracts:** Developed a high-performance Telegram Mini App using Next.js 15 and Telegram SDK. Utilized Viem for smart contract interactions (real-time bidding, asset minting) and integrated Reown (WalletConnect) for secure multi-wallet linking.
- **Admin & Minting Interfaces:** Created a comprehensive dashboard to monitor live auctions and transactions, alongside a dedicated asset minting page. Optimized layouts to achieve high Core Web Vitals scores across all devices.

**Backend & Real-time Systems**

- **Bot Logic & Notifications:** Built a modular NestJS backend integrating the Telegram Bot API for automated user retention alerts.
- **Real-time Infrastructure:** Implemented Socket.io and Redis Pub/Sub to deliver instant, real-time notifications for auction statuses and outbid events.

**Tech Stack**

- **Frontend:** Next.js 15, Tailwind CSS, Shadcn/UI, Wagmi/Viem
- **Backend & Infra:** NestJS, PostgreSQL/MongoDB, Redis, Telegram Bot API, Reown (WalletConnect)

03/2025 - PRESENT

**Estudyme**

**Web Developer**

**Frontend Development**

- **UI/UX & Component Architecture:** Engineered pixel-perfect, responsive Next.js interfaces from Figma. Developed a customized Material UI (MUI) component library, accelerating feature development time by 30%.
- **State & Media Management:** Centralized complex global states (auth, cart, course progress) using Redux Toolkit. Implemented robust processing logic for assignment uploads and multi-format learning materials (PDF, Video).

**Backend Development**

- **Core Game Services:** Architected scalable, shared backend modules, significantly streamlining the integration and deployment pipeline for new game titles.
- **API & Database Design:** Built scalable ExpressJS RESTful APIs for complex, multi-level course management. Refactored database models into clean repository layers, preventing regressions and enhancing codebase maintainability.

**Tech Stack**

- **Stack:** Next.js 12, Express.js, Material UI, Redux Toolkit
- **Tools:** Figma, Git, Postman

12/2024 - 03/2025

**Ngoại ngữ 24h (tienganhcomaiphuong.vn)**

**Web Developer**

**Backend & Admin Tooling**

- **Process Automation & APIs:** Developed internal tools to automate the formatting of raw exam files into structured database records, significantly reducing content update times. Designed and deployed scalable, high-performance RESTful APIs.
- **Code Architecture:** Refactored legacy components into a modular, loosely coupled architecture to ensure clean code and improve overall maintainability.

**Frontend & Performance Optimization**

- **UX & Performance:** Boosted page load speeds by optimizing asset sizes and rendering logic. Implemented robust error handling and loading states to ensure a seamless user experience.

**Tech Stack**

- **Frontend:** React.js, Styled-components
- **Backend & DB:** Node.js, Express.js, MongoDB
-

06/2024 - 12/2024

**MKT TIKPRO**

**Developer**

**Desktop Application & Automation**

- **Electron Architecture:** Built a cross-platform Electron.js app to concurrently manage thousands of TikTok accounts. Optimized Inter-Process Communication (IPC) to prevent UI freezing during heavy-duty tasks.
- **Browser Automation & Anti-ban:** Integrated Puppeteer/Playwright to simulate authentic user behaviors, minimizing ban rates. Developed a configurable engine for targeted, automated engagement (farming, liking, commenting).

**Data Mining & Workflows**

- **Lead Extraction & Viral Campaigns:** Engineered data mining modules to extract potential customer leads via UIDs and keywords. Developed automated seeding tools to optimize brand visibility across videos and livestreams.
- **Intuitive Workflows:** Streamlined complex automation scripts into user-friendly UI configurations, enabling non-technical users to easily deploy marketing workflows.

**Tech Stack**

- **Core & UI:** Electron.js, React.js, Tailwind CSS, Shadcn/UI
- **Automation & DB:** Puppeteer / Playwright, Socket.io, SQLite
